PROFESSIONAL SUMMARY

Mid-Level Frontend Engineer with 3 years of experience crafting exceptional user experiences through innovative web development solutions. Proficient in HTML5, CSS3, JavaScript, and modern frameworks like React.js, Vue.js, Angular, Next.js, and React Native for mobile app development. Skilled in architecting scalable frontend applications and integrating with backend services. A collaborative team player with strong problem-solving skills and a commitment to delivering pixel-perfect designs. Passionate about staying abreast of emerging technologies and industry trends.

SKILLS

- Programming Languages: Javascript/TypeScript, CSS, SASS, HTML
- Frontend Frameworks: React.js, Next.js, React Native Vue.js, Angular.js
- Tools:Github, Netlify, Vercel, Firebase, Heroku, Expo, Android Studio
- Frontend Libraries: Tailwind, Bootstrap, Chakra, AntD, Material UI, shadcn/ui
- Node.js

WORK HISTORY

FRONT END DEVELOPER | 01/2022 to Current
Xanotech - Lagos, Nigeria (Remote)

- Orchestrated API integration within a microservice architecture framework, facilitating fluid communication between frontend and backend systems to ensure seamless functionality.
- Spearheaded development and maintenance of retail and corporate internet banking templates utilizing React, delivering intuitive user interfaces that elevated customer's experience and garnered positive feedback.
- Engaged in collaborative efforts with cross-functional teams comprising designers, backend developers, and business analysts, fostering cohesive environment for understanding project requirements and implementing robust solutions.
- Implemented loan Business Process Automation (BPA) services, streamlining and automating complex workflows to increase efficiency and reduce processing times.
- Leveraged TypeScript to elevate code quality and bolster developer productivity while enforcing stringent type safety measures in expansive frontend projects, ensuring robustness and scalability in the application architecture.

FRONT END WEB DEVELOPER | 06/2021 to 12/2022
AshPot - Nigeria

- Significantly enhanced site load times through strategic implementation of asynchronous JavaScript loading techniques, image lazy-loading, and browser caching, resulting in 50% decrease in page load durations.
- Fostered seamless collaboration with UX and UI designers to meticulously translate

design visions into browser implementations, ensuring alignment with project objectives and user experience standards.
- Spearheaded optimization efforts for web applications, leveraging advanced methodologies such as code minification and caching, culminating in 50% improvement in overall application performance metrics.
- Expertly tackled intricate coding challenges pertaining to client-side scripting languages, particularly JavaScript and jQuery, effectively troubleshooting and resolving complex issues to maintain optimal application functionality and user experience.
- Crafted engaging and dynamic user interfaces utilizing cutting-edge technologies like React.js and Redux, elevating user engagement and satisfaction while adhering to industry best practices and design principles.

FRONT END WEB DEVELOPER INTERN | 03/2021 to 06/2022
AshPot - Nigeria
- Utilized TypeScript to enhance code quality, improve developer productivity, and enforce type safety in large-scale frontend projects.
- Participated in brainstorming sessions and design discussions, contributing ideas and learning from experienced team members to solve technical challenges, leading to 60% reduction in bug reports.
- Collaborated with cross-functional teams comprising designers, backend developers, and business analysts, resulting in 80% increase in project efficiency.

EDUCATION

Abia State Polytechnic - Abia State, Nigeria | OND
Computer Science, 02/2022

ACCOMPLISHMENTS

- Worked with a team of 10 developers in building an internet banking application for a micro-finance bank, enabling access to credit facilities for over 1000 customers.
- 2 times Employee of the Year
